

FOR IMMEDIATE RELEASE

Bushco Natural Resources Goes Live With Hyper Rig

LONDON, UK, January 2009 – Hyper Rig, the provider of multi-asset real time risk management solutions, today announced its first client, Dubai-based Bushco Natural Resources went live using Hyper Rig for all its risk management and trading strategy optimization requirements.

Bushco stated, “Before Hyper Rig came around there was no Front Office real-time solution for pre-trade analysis and whole portfolio analysis. Hyper Rig is a critical tool enabling us to effectively allocate capital to trading and investment, and leaving less expensive “idle” money in reserve, the reserve used to be there to cover our system inadequacies for keeping track in real-time of our portfolio exposures, or “System slippage” as we used to call it.”

“We are extremely pleased to have Bushco as a client of Hyper Rig,” stated Mike Hepburn, Managing Director of Hyper Rig. Bushco can now leverage Hyper Rig’s range of solutions such as real time VAR and stress testing to provide real-time information to the front desk and Bushco shareholders regarding its’ portfolios, its’ positions and exposure to asset classes.

About Buscho:

Bushco Natural Resources is a specialist physical commodity business and engineering firm operating in the former soviet union and middle east markets.

About Hyper Rig:

Hyper Rig Ltd provides real time, multi-asset risk management solutions to financial companies seeking to proactively manage their risk and transform how they do business. Purpose built for speed, Hyper Rig provides a complete modular risk solution that integrates intelligent messaging technology with grid computing and caching technologies to deliver unparalleled performance. Companies can aggregate their risk exposure across business silos to better understand their exposures and analyse it in real-time.

Using Hyper Rig's front end decision tools, companies can now perform real time VaR, Stress testing and "What If" simulations to react quicker to today's volatile markets. Quick reference visualisation dashboards have been designed for users to quickly spot problems and/or opportunities. Traders can now focus on exceptional activity or opportunity alerts that may foretell exceptional risk or exceptional profit instead of every trade.
