

FOR IMMEDIATE RELEASE**Hyper Rig Hires Laurent Louvrier As Director of Product Development**

LONDON, UK, January 2009 – Hyper Rig, the provider of multi-asset real time risk management solutions, today announced it has hired Laurent Louvrier to become Director of Product Development. Laurent has extensive financial risk experience having spent six years consulting for investment banks and asset management firms on IT assignments such as risk management systems implementation, investment process review, design and development of algorithmic trading strategies as well as four years in structuring and risk management roles.

“Laurent’s deep risk knowledge combined with his IT experience makes him a perfect fit for Hyper Rig. Laurent will play an instrumental role in understanding our clients’ risk management needs and working with our development team to ensure our solution delivers unparalleled performance and functionality” says Mike Hepburn, Managing Director of Hyper Rig.

Laurent Louvrier commented, “I am very excited to be joining Hyper Rig at this time as the company is in a prime position to address new industry need for intraday and real time risk management. I see a great opportunity for Hyper Rig to develop as the leading vendor in this space.”

About Hyper Rig:

Hyper Rig Ltd provides real time, multi-asset risk management solutions to financial companies seeking to proactively manage their risk and transform how they do business. Purpose built for speed, Hyper Rig provides a complete modular risk solution that integrates intelligent messaging technology with grid computing and caching technologies to deliver unparalleled performance. Companies can aggregate their risk exposure across business silos to better understand their exposures and analyse it in real-time.

Using Hyper Rig’s front end decision tools, companies can now perform real time VaR, Stress testing and “What If” simulations to react quicker to today’s volatile markets. Quick reference visualisation

Hyper Rig

dashboards have been designed for users to quickly spot problems and/or opportunities. Traders can now focus on exceptional activity or opportunity alerts that may foretell exceptional risk or exceptional profit instead of every trade.
